

## ITEMS WITH A COLLECTIVE TITLE

Many fiction books have several novelettes in one volume, often with a collective title.

The collective title should be transcribed in the 245, and any appropriate statements of responsibility. Often all the authors are listed on the title page.

Most of these works will have title main entry.

An unformatted 505 should be constructed with the title and author of all the included works.

A separate 700 should be made for each author and title.

There is access to the collected title in the 245. The separate titles are keyword accessible from the 505 and there is title access from the 700 \$t.

The example below is a model to use when handling these titles. (Only the pertinent fields are included)
