

## Library Cards for Non-Residents

August 2009

Fee Effective Date: Public library boards determine when their library's non-resident fee changes. Some boards choose the start of the library's fiscal year, others change the fee on 1 July and still others use 1 January as the date. The effective date for the non-resident's fee change is a local library board decision.

In Illinois, people living outside the service area of a public library are considered non-residents. Non-residents are eligible to purchase a library card from the public library under certain conditions. The sale of a library card to a non-resident is covered by the Illinois Statutes, 75 ILCS 5/4-7(12) and 75 ILCS 16/30-55.60 specifically. In early 2002, the Statute was changed to include reciprocal borrowing and to indicate where the non-resident was to purchase the card. To see the complete statute, visit <http://www.ilga.gov/legislation/ilcs/ilcs.asp> going to Chapter 75, Libraries.

### An Overview regarding the Purchase of a Library Card by a Non-Resident

Under the Illinois Statutes, an individual living outside of a public library's service area may purchase a library's patron/borrower card, providing the non-resident with library service. The law governs where the card is purchased and expands the borrowing privileges to include reciprocal borrowing for non-residents and non-resident property owners. The law does not change the ability of the local library board to decide whether or not to sell non-resident cards that continues to be a local decision.

The administrative rules implementing the law became effective on 1 July 2002. The complete text of the administrative rules is at, [http://www.cyberdriveillinois.com/departments/library/who\\_we\\_are/non-resident.html](http://www.cyberdriveillinois.com/departments/library/who_we_are/non-resident.html) please especially note Section 3050.10 - Commonality of community interests; Section 3050.25 (a), (b), and (c); Section 3050.40; Section 3050.50 (b); and Section 3050.70 (b). The Illinois State Library has also posted their informational memos distributed in response to implementation questions and along with links to each Systems' listing of participating libraries.

## Purchasing the Library Card

A non-resident must purchase the library card from the public library geographically closest to the individual's primary residence. The administrative rules to implement the law prescribe how the non-resident determines which public library is closest. To determine the appropriate library, check the non-resident's address in the [illinoismap.info](http://illinoismap.info) database.

- First, school district – the non-resident purchases their library card from the public library within their high school or unit district (see Section 3050.25 (a));
- Second, if there is not a public library within the school district, the commonality of community interest will determine the appropriate library for the non-resident to use. If there is any uncertainty, the System determines from which library the non-resident purchases their library card (see Section 3050.25 (c) with the cooperation of local participating libraries. For a listing of public libraries and their non-resident service area, see the *Public Libraries of the Lewis and Clark Library System* section.
- Third, if there is more than one public library within the school district, the commonality of community interest will determine the appropriate library for the non-resident to use. If there is any uncertainty, the System determines from which library the non-resident purchases their library card (see Section 3050.25 (c) and the cooperation of local participating libraries. For a listing of public libraries and their non-resident service area, see the *Public Libraries of the Lewis and Clark Library System* section.

## Figuring the Purchase Price of the Non-Resident Card

Under the Statute, the Illinois State Library is responsible for developing equitable formulas to determine the library's non-resident fee. Public libraries choose one of three formulas/methods to calculate the fee for the non-resident library card. The library must select one method from the three, clearly stating their choice as a board action.

Method One — General Mathematical Formula: The library divides its tax revenue by the library's population; this number is multiplied by the average household population. This is the fee charged to all non-residents when purchasing a library card.

Method Two – Tax Bill Method for Home/Property Owners: The library's tax rate is multiplied with the valuation of the non-resident's property assessment. The non-resident must bring their most recent tax bill then this method is used. When this method is chosen, each non-resident card sold must be individually recalculated.

Method Two – Tax Bill Method for Renters: The library will: 1) charge the renter a minimum of 15% of the individual's monthly rent. For example if the monthly rent is \$545, multiplied by 15%, the non-resident fee would be \$81.75. Or 2) the library devises its own formula. If the library decides to devise its own renter's formula, several issues need to be factored into the formula: a) the average local rent of the general community within the library's service area; b) the library's property tax rate; and c) the non-resident fee of home/property owners.

Method Three — Adoption of an Average Non-resident fee: This method would only be applicable to public libraries with a disproportionate amount of agricultural, industrial, mining or commercial property. In the Lewis & Clark Library System, few libraries would qualify, probably only Hartford and Roxana Public Library Districts. A library must have written approval from the Director of the Illinois State Library to use this method to determine the non-resident's fee.

### Public Library Responsibilities

Each year, the library's board of trustees decides if the library will sell library cards to non-residents for the next year. During this meeting, it will also be stated which method the library will use to figure the non-resident card fee.

- LCLS public libraries honor Illinois non-resident cards for reciprocal borrowing purposes.
- The public library makes available for interested individuals a description of the library's service area and a description of the method chosen to determine non-resident card fees. For the description of the library's service area, a map of the library's boundaries will be fine.

### System's Responsibilities

- Collect from the public libraries information on whether, as of 1 July each year, the library will be selling non-resident cards.
- Maintain this information on the System's web page and in print.
- As necessary, determine from which public library a non-resident must purchase a non-resident card.

## The Public Library Members of the Lewis & Clark Library System

This information, posted in accordance with the Illinois Administrative Code, is available to assist non-residents and public library staff as they decide the appropriate library from which to purchase a library card. Under the implementation rules, non-residents must purchase their library card from the public library within their school district. To help verify the appropriate library, each library is listed with its Non-resident Service Area. As needed, commonality of community life may also be factored into the decision.

Several libraries did not reply to the annual non-resident fee survey. This has been noted as *no reply* next to the library's name.

Fee Effective Date: Public library boards determine when their library's non-resident fee changes. Some boards choose the start of the library's fiscal year, others change the fee on 1 July and still others use 1 January as the date. The effective date of the non-resident's fee change is a local library board decision.

To determine the appropriate library, check the non-resident's address in the [illinoismap.info](http://illinoismap.info) database.
